DAVID AYODELE

Lagos, Nigeria | +234 805 164 1446 | adavidoluwafemi@gmail.com | github.com/davidayodele01 | Portfolio: https://davidayodele.vercel.app/

PROFESSIONAL SUMMARY

A Frontend Developer with a strong UI/UX design background, combining hands-on product design experience including wireframing, prototyping, user research, and design systems with practical React and JavaScript development skills. Experienced in translating user needs into interactive, accessible interfaces and building them in clean code. Adept at collaborating across the full product lifecycle with cross-functional teams to deliver high-performance digital experiences.

CORE SKILLS & KEYWORDS

Development: JavaScript (ES6+), HTML5, CSS3, React.js, React Hooks, React Context API, Tailwind CSS, Framer Motion

Design Tools: Figma

Design Process: Wireframing, Prototyping, User Research, User Personas, User Flows, Storyboarding, A/B Testing, Design Systems, Usability Testing

Dev Tools & Platforms: Git, GitHub, Visual Studio Code, Vite, Vercel, Trello

Concepts: Component-Based Architecture, Responsive/Mobile-First Design, REST API Integration, Cross-Browser Compatibility, Agile Collaboration

Soft Skills: Clear Communication, Attention to Detail, Analytical Thinking, Time Management, Creativity, Team Collaboration

WORK EXPERIENCE

Frontend Developer — *Cognorise Infotech Internship*
September 2026 – October 2026

- Developed responsive and reusable web interfaces using **React.js**, component-based architecture, and **Tailwind CSS**, ensuring consistent experiences across desktop, tablet, and mobile devices.
- B build a portfolio project, using TailwindCSS, React, JavaScript, EmailJs and CSS animation
- Built and integrated reusable components https://landing-page-react-framer-motion-an.vercel.app/ for sections including **Hero, Features, Pricing, Testimonials, and Newsletter**, improving code maintainability and scalability.
- Implemented smooth **animations, transitions, and micro-interactions** using Framer Motion to enhance user engagement and overall UI experience.
- Applied **mobile-first responsive design principles** and translated UI designs into functional frontend interfaces.
- Configured **GitHub-to-Vercel deployment workflows**, managed production builds, and resolved cross-environment build and deployment issues.
- Developed a single-page **Task Management application** https://task-manager-app-todo-app.vercel.app/ with React.js, implementing task creation, completion toggling, and deletion with real-time UI updates.
- Implemented **localStorage persistence** with React useEffect, allowing task data to remain available across browser sessions.
- Managed application state using React hooks and built reusable, maintainable frontend logic for interactive features.

UI/UX Designer (Hybrid) — *Techxon Innovation Limited, Lagos, Nigeria*
March 2025 – April 2026

- Designed responsive web and mobile interfaces for https://carkobo.com/ an all-in-one automotive hub supporting car buying, renting, financing, live auctions.
- Conducted competitor benchmarking and user journey mapping to unify distinct transaction types (renting vs. buying vs. bidding) under a cohesive visual hierarchy.
- Designed dynamic vehicle filtering systems, interactive loan calculators, and high-converting car detail pages (PDPs) optimized for trust and clarity.
- Formulated the end-to-end user experience for a dedicated procurement module, simplifying item requesting, purchase approvals, and inventory management.
- Created high-fidelity interactive prototypes for user testing and handed over pixel-perfect specs, design tokens, and edge-case documentation to front-end developers.

UI/UX Designer (Contract) — *Vezeti Telecommunications, Lagos, Nigeria*
March 2024 – September 2025

- Designed wireframes and high-fidelity screens for a B2B dashboard used by business teams to coordinate workflow.
- Developed user personas, user journeys, and wireframes to visualize design concepts and product flows.
- Ran A/B tests and iterated designs based on user feedback and data.
- Built a reusable component library and design system, improving team design/dev productivity and consistency.
- Collaborated with product managers and engineers to translate research findings into design decisions.

UI/UX Designer (Contract) — *Katab Royals Limited, Lagos, Nigeria (Remote, US client)*
July 2024 – September 2024

- Collaborated with a design team to build the Katab Royals website across mobile and web.
- Built and tested prototypes to validate customer needs and behaviors before development handoff.
- Established a library of reusable UI components and style guidelines for consistent implementation.

UI/UX Designer (Remote) — *Swiftsell Limited, Lagos, Nigeria*
July 2021 – July 2023

- Designed responsive web and mobile interfaces for https://www.swiftsell.shop/ and https://www.southsidefood.com/
- Conducted user research to inform data-driven design decisions.
- Created interactive prototypes, wireframes, and user flows; documented design and functional requirements.
- Worked closely with stakeholders, developers, and product managers throughout the design process.

PROJECTS

Interactive Landing Page | *React.js, Tailwind CSS, Framer Motion, Vercel*

- Built a fully responsive, multi-section landing page (Hero, Features, Pricing, Testimonials, Newsletter) using reusable React components.
- Implemented fluid scroll animations and micro-interactions with Framer Motion, and applied mobile-first design with Tailwind CSS.
- Configured automated deployment from GitHub to Vercel, resolving cross-environment build issues.

Task Manager App (Todo) | *React.js, Tailwind CSS, LocalStorage*

- Developed a single-page task management app with add/toggle/delete functionality and real-time UI updates.
- Implemented persistent storage using localStorage and the useEffect hook, preserving data across sessions.
- Admin dashboard using rechart, tailwind css

Admin Dashboard | *React.js, Tailwind CSS, JavaScript*

- Designed and integrated dynamic sparkline charts using Recharts to display key performance metrics and monthly growth trends at a glance.
- Built performant, searchable data tables using Material UI DataGrid with pagination, sorting, and inline filtering for seamless user administration and top-deal tracking.

Additional Design Projects: swiftsell.shop · southsidefood.com · carkobo.com

EDUCATION

BSc Statistics
Federal University of Agriculture, Abeokuta — Abeokuta, Nigeria | May 2018

Self-Directed Frontend Development & Web Technologies

- Hands-on project-based learning focused on React component architecture, utility-first CSS, and Git version-control workflows.

TRAINING & CERTIFICATIONS

- TerraHQ Certificate — certificate.terrahq.co/111668EKGB3DAUW116

- Coursera Certificate — coursera.org/share/4c83d4043c5c1eaa324a64b40765729a
- Scrum Fundamentals Certified (SFC) — verify at scrumstudy.com
- Torilo Academy
